P13A1ADMS: Advance Database Management System

Question Bank 2023

Unit I

- 1.What is Oracle?
2. Discuss the concept of “Grid Computing” in detail.
3. What is Oracle Server? Discuss the terms Oracle Database and Oracle Instance.
4. Discuss the features of Oracle 10g.
5. Which processes are known as Background Process? Discuss all the background processes in brief.
6. What is System Global Area (SGA)? Discuss various parts of SGA.
7. Discuss the Structure of the Database with suitable figure.
8. Discuss Memory Management in Database Structure.
9. Write a note on: Oracle Instance Management.
- 10.Discuss the process structure of database.
- 11.Discuss various states of Buffers in Database Buffer Cache (like pinned, clean, free and dirty).
- 12.Give the difference between SGA and PGA.
- 13.Discuss Storage Structure of database with different files used for physical storage.
- 14.Discuss Logical Structure of the database with the use of Tablespaces, Segments, Extents and Data Blocks.
- 15.Discuss SYSTEM and SYSAUX tablespaces in short.

Unit II

- 1 Explain the managing Database Storage Structures and how table data is stored in database?
- 2.Explain the Anatomy(Structure) of a Database Block.
- 3.State the difference between Locally Managed and Dictionary Managed Tablespaces.
- 4.Write down the syntax for creating Tablespace with all the necessary parameters. Also show how we can retrieve the tablespace information using SQL prompt.
- 5.Write a note on: Tablespaces in Preconfigured databases.

6. Write down the steps for creating Tablespace using Enterprise manager.
7. Write down the steps for altering Tablespace using Enterprise manager.
8. Discuss all Actions with Tablespace.
9. Write down the syntax for dropping the Tablespace.
10. How to Viewing Tablespace Information in Enterprise manager and which contents are displayed?
11. How to Enlarging the Database?

Unit III:

1. What is flashback Technology? explain its benefits.
2. Write a short note on flashback Database.
3. Explain Flashback table with example.
4. Explain flashback query with all option or explain flashback navigation with example.
5. Write down steps to flashback dropped table form enterprise manager.
6. Write SQL query for flash back table and dropped table.

Unit IV:

7. What is moving data? Discuss general architecture.
8. Discuss directory object. How to create directory object.
9. What is data pump? Explain import and export.
10. Describe fixed-width record format with example.
11. Explain various SQL * loader commands.
12. What is SQL *loader? Explain any six datatypes.
13. Write a short note on SQL Datapump utility.
